

**As a group of concerned Sunshine residents on Minnesota Street, we are asking that you will address the following problem. Our homes are located along the intersection of Kansas and Minnesota streets adjacent to the drainage ditch behind our properties.**

**Through the past year or more, we see declining drainage in the outlet and the ditch due to a substantial buildup of soil and grasses. Even after big rains the water is stagnant, breeds mosquitoes, smells bad, attracts snakes and is collecting debris.**

**We feel that <sup>"dredging"</sup> and other maintenance is needed to remedy the situation.**

**We thank you in advance for attention in this issue.**

**Most sincerely,**
